

Model No.

3D Printer and Fabricator

Company Introduction

[Model No.](#) is an exciting startup using advanced algorithmic design and digital manufacturing to give you the power to curate a design just how you want. We are the producer of high quality, environmentally friendly products authored by you!

Job Description

We are looking for a talented fabricator who's excited to make new things in new ways and passionate about quality and craft. Responsibilities include running large 3D printers and CNC routers, finishing parts, assembling product, and maintaining our awesome machines and shop space. Willing to train the right person on the various technologies, but need to have had some exposure to digital fabrication, working online, and/or a quick learner.

Responsibilities:

- Running 3D prints, Maintaining 3D printers, and ordering 3D printing supplies.
- Running CNC routing jobs, Maintaining CNC routers, and ordering CNC supplies.
- Help Manage production queue & supporting design team with print needs.
- Cleaning up parts & assembling product.
- Maintaining a clean and organized work area.
- Following shop safety standards and company operations.

Required Skills:

- Demonstrated interest in 3D printing, CNC routing, and digital fabrication.
- Experience in Additive or Subtractive manufacturing, experience in both preferred.
- Attention to detail, organized, team player, and self motivated.
- Some experience with Fusion 360, Rhino, 3D printing slicing software, and/or CAM software (and willing to learn a whole lot more about it!).
- Comfortable working with online for scheduling, task management, product info, email, chatting, etc.
- Comfortable working in a dynamic, growing, and developing team environment.

Benefits:

- Paid vacation and sick leave
- Medical, vision, and dental insurance

Bonus Points:

- Casual office environment of serious professionals
- Team-oriented work space
- Group lunch
