

Fabricator

Company Introduction

[Because We Can](#) is an Oakland-based creative established design-build architecture studio that produces great buildings, interiors, furniture, and art.

Job Description

We are looking for a talented fabricator who's excited to make new things in new ways and passionate about quality and craft. Responsibilities include running CNC routers, finishing parts, assembling custom fabrications, and maintaining our awesome machines and shop space. Willing to train the right person on the various technologies, but need to have had some exposure to digital fabrication, working online, and/or a quick learner.

Responsibilities:

- Running CNC routing jobs, Maintaining CNC routers, and ordering CNC supplies.
- Cleaning up parts & assembling completed custom fabrications.
- Maintaining a clean and organized work area.
- Following shop safety standards and company operations.

Required Skills:

- Experience in custom fabrication, construction, millwork, woodworking, or equivalent required.
- Demonstrated interest in CNC routing and digital fabrication.
- Attention to detail, organized, team player, and self motivated.
- Comfortable working with online for scheduling, task management, product info, email, chatting, etc.
- Comfortable working in a dynamic, creative, and friendly team environment.

Benefits:

- Paid vacation and sick leave.
- Medical, vision, and dental insurance.

Bonus Points:

- Casual office environment of serious professionals
- Team-oriented work space
- Group lunch
