

CNC Machinist with Manual Experience

We are a precision CNC Machine Shop located in Hayward, CA

We have a full time/day shift position for a CNC machinist. Manual machinist experience is a plus, as well as cylindrical grinding.

- Responsible for setup and operation of CNC Machine Centers.
- Must have experience with complex, tight tolerance parts and various materials.
- Capable of interpreting and editing CNC programs using Fanuc and Fadal.
- Must be proficient with all/various types of machine center processing
- Modify programs as required to meet product conformity.
- Read blue prints and job traveler specifications to determine the proper tooling required to set up each operation.
- Inspect for conformance to specifications using standard measuring tools. (Experience using precision measuring devices eg Micrometers, calipers)
- Replace cutting tools as required to meet product conformity.
- Deburr work pieces as required.
- Experience in shop math, tooling technology, blueprint reading and measuring of parts.
- Maintain a clean and organized working area, keep safety and quality standards as a priority.

We offer competitive benefits.
