

**NOW HIRING** Creatives eager to share their skills and knowledge while continuously gaining exposure and access to their chosen industry.

Join a positive learning environment where students are working with cutting edge technology – and you are there to offer your expertise on best practices for program-specific software and equipment. *This is a unique opportunity to grow and expand in your field while assisting students.*

The **Jewelry and Metal Arts Technician** provides professional customer service by working and troubleshooting directly with the students, staff, and industry professional faculty. You will be responsible for maintaining and troubleshooting equipment issues, and maintaining a clean and productive learning environment – in over 5,000 square feet of fabrication space that includes welding, wood and machine shops and three fully equipped jewelry studios.

**In this role you will work up to 40 hours per week for the length of the Spring semester: February 3rd to May 23rd, 2020**

The Academy offers great part-time benefits such as: one tuition-free undergraduate class per semester, paid sick leave accrual, a commuter program and a 401K plan. We also have a swimming pool with multiple lanes, two fitness centers and many recreational programs that you are welcome to benefit from throughout the term.

The Academy's jewelry studios and shop facilities are designed to prepare our students for a career in jewelry and metal arts.

Our hands-on learning environment creates a culture that supports curiosity, investigation, and production.
