

Shop Technician / Milling Assistant:

Full service design and fabrication company is searching for a high energy shop assistant to help our team with various fabrication processes. General responsibilities include work station preparation and clean-up, transport of parts through our facility, and assisting our team with layout, cutting, and prepping production molds milled from foam, MDF, and plywood. Candidates should possess a strong work ethic and take pride in producing quality results.

Job Requirements:

- Basic carpentry skills
 - Experience with hand and power tools
 - Ability to accurately take measurements
 - Strong verbal and written communication skills
- Ability to follow a schedule and hit deadlines
- Desire to expand current skill set and learn new fabrication methods

Work Hours and Benefits:

- Full Time Position - 40 hours per week
- 15 days PTO per year
- 7 Paid Holidays
- Medical, Dental, and Vision insurance available on the first day of the month after hire date
- 401k plan available 1 year after hire date

Preferred but not required:

- Valid CA drivers licence
- Bilingual (Spanish/English)
- Ability to read drawings and templates
