

**Position Title:** Builder - Technician  
**Location:** Oakland, CA

### **About Lilac:**

Lilac Solutions is a lithium extraction company unlocking brine resources and providing essential raw materials to the battery industry. Lilac's unique ion exchange process eliminates the environmental impact of conventional lithium extraction while boosting production. The company was founded in 2016 by a team of engineers passionate about delivering innovations to the mining sector to minimize environmental impact and support the clean energy economy. Lilac is committed to diversity and inclusion.

### **Job Description:**

Lilac is seeking a machine builder to fabricate components, structures, and machinery from print. Responsibilities will include welding, using machine shop equipment, using hand tools, and building frames from print. Candidate will also work closely with engineering and aid in design work. Process equipment and systems include bench, pilot, and commercial scale.

This is a full-time position.

### **Candidate Requirements:**

- 2+ years of hands-on building and fabrication work
- Skilled with hand tools and table-top shop equipment
- Able to read engineering prints
- Excited to work on a small fast-paced startup team
- Driven to learn quickly and grow with company
- Preferred: MIG Welding, electrical panel building, field wiring, CAD experience

### **Compensation:**

- Competitive pay
- Stock options
