

Magico LLC Job Opportunity

CNC Machinist and/or Programmer

Magico LLC is looking for a motivated individual, who can program, set up, and run Haas CNC mills and Lathes. Short run- Prototype and Production runs. Troubleshooting, and design for manufacturability. We are also looking for someone who is solely an operator and not a programmer. Please submit a resume if you fit either of these descriptions.

Essential Job Functions:

Analyze job orders, drawings, blueprints, specifications, design data in order to calculate part dimension compatibility with machines, tool selection, machine speeds and feed rates.

Ability to setup, program, operate and troubleshoot CNC mills and lathes.

Ability to reduce setup time and machining through process improvements

Machine parts to print.

Store, retrieve, and transfer CNC data as required.

Observe machine trial runs or conduct computer simulations to ensure that programs and machinery will function properly and produce items that meet specifications.

Practice safe and accurate application of cutting tools, adhering to correct parameters and general machine shop practices.

Recognizes, deploys and properly uses inserts, fixtures and tooling

Designs necessary tooling and fixtures for the job

Attends design meetings and actively participates by providing meaningful input

Show proper process for 1st article.

Positive and Strong work ethic

Requirements:

Knowledge of HAAS CNC Mills and Lathes.

Ability to use MasterCam and Solidworks is a plus.

Minimum Two (2) years of experience with CNC Programming in machining of parts. Or two years of setup and operator experience.

Must be able to lift and carry up to 70 lbs.

Job Type: Full-time
