Holt Tool Machine & Company in Redwood City is seeking for a skilled Tig and Mig Welder. We specialize in customized various metals such as steel, bronze, aluminum, and stainless steel. This job requires close attention to detail and craftsmanship with good communication skills. Teamwork is essential to the success of our business that has been established for over 80 years. All of our custom projects are built from comprehensive shop drawings.

Applicant needs to be competent in Metal Fabrication and experienced in the following:

- Proficient ability to read & comprehend drawings and perform layout.
- Good communication skills. Willingness and ability to work well with others.
- Fabrication procedures including Mig & Tig welding. Proficiency in Metal
- Fabricating tools and machines. Machining experience is helpful.
- Dependable work ethic and Good Positive Attitude.
- MUST have certification for completion of welding program

A good candidate must have willingness to learn CNC, can do machining and welding.

We are willing to teach the right person how to use the latest Computerized CNC machine in an environment of constant change and challenge. Training and financial assistance for schooling is provided for qualified individuals. We encourage students who are good in math and who is willing to learn. In addition, our company pays for all company related FASTRAK toll expense.

If you are qualified, please email your resume to info@holttool.com
