

## Maintenance Technician Position at Scandic Springs

12/21/21

Scandic is a Bay Area leader in making custom metal stampings and springs. We are an established business and we never missed a day of work during the pandemic. We have an immediate opening for a maintenance technician.

### **Responsibilities include:**

- performing regular preventive maintenance on machines and production equipment including air compressors, pneumatic plumbing, electrical and HVAC and custom equipment on equipment per defined schedules.
- hands-on troubleshooting of sophisticated mechanical and electro-mechanical systems, with a strong industrial electrical/electronic background.
- participation in the Safety Committee.

### **Job requirements:**

- good mechanical aptitude
- ability to work with all types of mechanical tools (lathe, mill, grinder, saw) and welding equipment
- blueprint reading
- self-motivation, attention to detail, team worker
- detail oriented and able to multi-task, perform effectively under pressure, and complete assignments
- willing to engage in continuous learning as technology evolves
- willing to get dirty in the course of equipment and facilities repair and cleanup
- ability to perform moderate to heavy lifting, climb ladders, and work in standing position

This is a full-time position, reporting to the Production Manager. Benefits include paid health, dental, and vision insurance; 401(k) matching; paid vacation and holidays; and tuition reimbursement.

Location: San Leandro

Hours: there is some start time flexibility, but generally 6:00 – 2:30.
