

APROE

Advanced Prototype Engineering

Position: Contract CAD Drafter

About the Position:

We are looking for CAD drafters to help draw machines for a wide variety of machine shop setup projects. CAD drafters will create models of a range of machine tools, including CNC, manual, robotics, etc. This position will support the shop setup team and be an integral part of completing large scale installation projects throughout the country. The ideal candidate will have an interest in machine tools and an ability to create complete models from both vendor drawings and physical machines. Proficiency in Solidworks is required and familiarity with Adobe Illustrator would be helpful.

Work will include:

- Creating 3D CAD models of machine and manual tools from vendor drawings and physical machines
- Creating cut sheets (orthographic projections) of machines and apparatus for installation and setup process
- Organizing and managing data for machine specifications

This position is a part-time, 1099 contractor opportunity. The contractor must provide his/her own working environment / work space, computer and software. Some local travel may be required.

About APROE:

Advanced Prototype Engineering is a design and engineering firm specializing in the development of mechanical prototypes and the creation of cutting edge production facilities. We work with companies and individual entrepreneurs to turn innovative concepts into fully realized models. We provide a range of consulting, design, engineering, and production services that correspond to our core areas of expertise.

If you are interested in this position, please contact info@aproe.com with a resume, sample CAD drawing, and an hourly rate. Please no phone calls.

APROE is an equal opportunity employer.
