UPS is currently hiring Building and Systems Engineering (BaSE) Mechanics. This position is responsible for maintenance activities that are performed to keep a UPS package handling facility operating efficiently and effectively. The work is fast-paced and requires routine interaction with other hub employees. Ideal candidates must be available to work 1st, 2nd, or 3rd shift, in a 24 x 7 operation. He/She requires strong electrical background and must pass electrical assessment.

### Responsibilities and Duties

- Troubleshooting, adjusting, and replacing AC and DC electrical equipment such as batteries, control stations, fuses, motor starters, relays, switches, timers, servo driven equipment, photo electrical devices, transducers, Variable Frequency Drives (VFD's) and encoders
- Inspecting, troubleshooting, repairing, and/or replacing mechanical components such as motors, reducers, drive chains, sprockets, sheaves, pulleys, rollers, conveyor belts, bearings, and transfer plates
- Inspecting, troubleshooting, repairing, and/or replacing pneumatic equipment such as diverters, lubricators, hoses, and coils
- Inspecting, troubleshooting, repairing, and/or replacing hydraulic equipment such as hoses, fittings, cylinders, and pumps
- Welding equipment such as handrails, conveyor supports, package handling equipment, carts, and grating as defined by scope of work
- Performing preventive maintenance inspections of plant equipment such as conveyors, bulk carts, and power industrial equipment

UPS is an equal opportunity employer. UPS does not discriminate on the basis of race/color/religion/sex/national origin/veteran/disability/age/sexual orientation/gender identity or any other characteristic protected by law
