

# Design & Fabrication Job in the Mission

We are a design & fabrication studio with work spanning bicycle shops, museums, & custom furniture. We work with architects, designers, & inventors, using contemporary and traditional techniques. Our shop spans table saws & chisels to a 4' x 8' CNC router, supported by extensive CAD capabilities.

**Do you want to learn how to run a large CNC , learn traditional woodwork, & craft with green techniques and materials?**

We can offer you a flexible schedule of 3-4 days a week. Pay is commensurate upon experience, & workmen's comp is included. Additional benefits include access to our tools in off time for your personal projects which include the CNC router.

**Interested? Contact [adam@pseudo-studio.net](mailto:adam@pseudo-studio.net)**
