

Redwood Materials

About Redwood Materials

Redwood Materials is a sustainable materials company that was founded in 2017 to develop and deploy new technologies for dramatically increasing the scope and scale of recycled and sustainable materials in global supply chains.

Operations and Maintenance Technician Role

Redwood Materials is seeking an entrepreneurial, hands-on, and versatile Operations and Maintenance Technician to tackle a variety of projects for the company. As with any startup company, projects and tasks will vary, but primarily include: (i) operating and performing outage and scheduled maintenance on production equipment and office facilities; (ii) driving commercial vehicles and trucks to execute pickups and deliveries; and (iii) managing materials and parts staging within company warehouses and storage facilities.

The position is a full-time, hourly position located in the San Francisco Bay Area, and compensation will be commensurate with experience.

Desired Qualifications

- A.S./A.A.S. or comparable certificate with significant technical experience
- 3-7 years of progressive experience in a technical operations and maintenance role
- Detailed knowledge of and troubleshooting capability with mechanical, electrical, HVAC, hydraulic, and pneumatic systems
- Experience with commercial vehicle and forklift operation
- Current safety training
- Highly self-motivated, entrepreneurial mindset
- Willingness to contribute at all levels of the organization

Application Process

Please send a resume and email describing your interest to recruiting@redwoodmaterialsinc.com. Applications will be accepted on a rolling basis until the position is filled.
