

# IMPOSSIBLE™

**Impossible Foods** was founded in 2011 to create a truly sustainable global food system by inventing an efficient, sustainable way to transform plants into irresistibly delicious, nutritious food - food that delivers the pleasures and nutritional benefits consumers demand, without the destructive environmental impact. Our first product, the Impossible Burger, was introduced by top chefs to the world and is currently available at over 1,000 restaurants across the United States.

OAKLAND, CA
