FACILITY AUTOMATION AND PLCS

CLASS CODE, ET140

Starts 8/20

Automation and Process Control using PLC and Drives exist in food processing, transportation, municipal water and waste, traffic control and manufacturing. Perform task like luggage/package sorting, conveying, pumping water, traffic light and street light control, regulating oven temperatures, HVAC automation, auto assembly, etc.

If you are looking to gain experience in this widely applicable knowledge and skill set, go to CCSF and register for **ET140. Facility Automation and PLCs.**

Activities will involve hands-on assembling of a control panel, programming PLC and interfacing drives for specific purpose and troubleshooting and repair of system issues down to the component level. Gain skills in wiring, acquire relevant NEC knowledge, IP/NEMA, Motor/Drive interface, sensor use and application, reading prints and more.
